

# Functional Gaussian Approximation for Dependent Structures

## A list of corrections

1) Page 63, the points (i) and (iii) of Lemma 3.1 have to be corrected as follows

- (i)  $\sum_{j=0}^{\infty} 2^{-j} \mathbb{E}_{\mathcal{G}}(S_{2^j} \bar{S}_{2^j})$  is convergent ,
- (iii)  $\sum_{j=1}^{\infty} \text{corr}_{\mathcal{G}}(S_{2^j}, \bar{S}_{2^j})$  is convergent ,
